**DETAILED ACTION**

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6-11, 14 and 16 rejected under 35 U.S.C. 103(a) as being unpatentable over Hagen et al. [6424722].

Hagen et al. disclose an apparatus [40] for adding functionality to a portable electronic device [10] comprising: a housing [figure 1] to be accepted by a housing port [18] of a portable electronic device [10], the housing having an interior portion; and a hardware interface connector [column 7, lines 58-65] positioned within the interior portion of the housing to be accepted by a hardware interface port of the portable device.

Hagen et al. disclose the instant claimed invention except for the specific number of pins used on the interface connector and their specific arrangement.

It would have been obvious to a person having ordinary skill in the art at the time invention was made that the number of pins used and their specific arrangement would have been an obvious design consideration based on the specific device intended to be connected to the adapter to be connected to the portable electronic device.

Art Unit: 2841

The specific method steps claimed would have been necessitated by the product structure.

### ***Response to Arguments***

Applicant argues that the Hagen et al. fails to teach the contacts being located within the interior portion of the housing. Applicant claims an interface connector being positioned within the interior of the housing. Applicant has not claimed, nor has examiner considered, the contacts themselves being within the housing. Hagen et al. discloses the contacts being accessible from the exterior of the housing with the contact supporting portion being positioned within the housing, see figure 1. Applicant further argues that examiner fails to establish a prima facie case the specific number of pins used in the parallel rows. Applicant has not set forth any advantage to a specific pin arrangement other than the pins being arranged in parallel rows as shown by Hagen et al.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
